

# Trailer Series

## Combination Sewer Cleaner

- 3 Yard Debris Tank & 600 Gallon Water Tank
- 1400 CFM or 3000 CFM Blower
- 40 GPM @ 2000 PSI Water Pump
- Tethered or Wireless Remotes
- NEMA 4 Electrical System
- 4" or 6" Hose System
- Rotating and Extendable Boom
- Fixed or Rotating Hose Reel

## Hydro Excavator

- 3 Yard and 6 Yard Debris Tanks
- 1400 CFM, 2400 CFM, or 3000 CFM Blowers
- 5 GPM @ 2500 PSI Water Systems
- Tethered or Wireless Remotes
- 200,000 BTU Diesel Fired Boiler
- 4" or 6" Hose System
- Fixed Hose or Rotating Boom
- 3 Stage Filtration

## Catch Basin Cleaner

- 3 Yard and 6 Yard Debris Tanks
- 1400 CFM, 2400 CFM, or 3000 CFM Blowers
- High and Low Pressure Water Systems
- Tethered or Wireless Remotes
- NEMA 4 Electrical System
- 4" or 6" Hose System
- Fixed Hose or Rotating Boom
- 3 Stage Filtration

# HX Series 6"

The RamVac 6" Vacuum-Excavators are purpose built for the job. The 6" system mated to a 3000 CFM/18"HG Positive Displacement Blower gives you 180+ MPH air flow to move material as fast as you can cut it. The 6" Truck is available in highly maneuverable 3yd and 6yd configurations or in 9yd and 12yd to accommodate continuous digging without the need to dump.

# HX Series 8"

The RamVac 8" Hydro-Excavators delivers not only class leading Hydro-Excavation capabilities but give you the ability to bulk load material as well. The 8" systems 5500 CFM/27"HG Positive Displacement Blower has the unique ability to be activated from the system control panel so you don't have to go to the cab to activate your blower. The RamVac HX in 8" is also the only Excavator in its class to offer the Temperature Controlled Environmental Chamber to prevent our water system from freezing.

## 6" Features:

**Direct Drive Hydraulics** is an exclusive feature to the 6" RamVac HX Series. The front mounted hydraulics take out the need for a PTO or transfer case drive, thus eliminating a component and increasing reliability.

**NO Federal Excise Tax** on the 6" HX in 3 and 6 yard configurations. The 3 yard configuration will even take you below the CDL requirement.

**NO DUMP Offloading** allows you to offload your debris without having to dump the tank.

## 8" Features:

**Blower Activation at the Control Panel** keeps the operator from having to climb in and out of the cab every time they need to turn the blower on or off.

**Dual Cyclone and Final Filters** ensure that your blower is protected even when the job calls for excavating dry materials.

**Bulk loading material** even at a distance is no problem for this machine. 5500 CFM Blower producing 180 MPH of air flow allows you to pull large debris with little effort.

## HX Series Features:

**Temperature Controlled Environmental Chamber** is an exclusive HX Series feature. This compartment is an industry first, keeping all of the water components inside a temperature controlled compartment. Weather it's 100° F or 0° F you can be sure the machine will not freeze or overheat

**Air Excavation Systems** are available on all of the HX Series Excavators. Dig effectively with air when conditions demand it.

**Exclusive Boom System** featuring a misting system to help promote separation of material, the unique replaceable wear plate, and easy remove access port.

**Sealed Electrical Systems** are standard on the HX Series. The use of NEMA 4 moisture and dust resistant control panels, sealed junctions, weather pack connections, and loomed wiring create an incredibly reliable electrical system.

**Variable Flow Water System** gives you the ability to use only the water you need to get the job done. With 0-18 GPM and up to 2,500 PSI allows you to customize your water for varying job requirements.

**Wireless Remotes** with the capability of up to 800' of obstructed use give you the capability to work independently without the danger of tangled cords.
